In your study, you have examined the effectiveness of various methods of teaching and learning. Specifically, you have compared traditional methods (Assessment Method) with more modern approaches (Observation Method). Your findings suggest that while traditional methods may be more familiar, the newer methods tend to foster greater engagement and understanding.

### Key Findings

- Personal Hygiene
- Observation Method
- Group Discussion

---

### Conclusion

Both methods have their merits, but the choice between them should be guided by the specific learning needs of the students.
