

Electromania

Primary

Travel the journey to excellence in robotics. The renowned Robo Tech Institute is collaborating with DPS facilities to provide the most valuable opportunity to the undiscovered genius. Their focus on STEM (Science, Technology, Engineering & Math) will develop fun techniques for latest technological applications and help shift the focus from screen dependence and gadget addiction to empower the mind and inculcate creative confidence!

Intellectual fodder for the young and curious, **Electromania** is an exciting course offering insight into the usage of electrical components; an opportunity to gain technological wizardry where individual challenges will enhance personal technological potential.
