

Scientific Games

Primary

The development of a child's brain is greatly influenced by their exposure to challenging games and situations that require problem-solving. With this in mind, DPS is proud to announce a 'Scientific Games' programme that will immerse your child in an experience that will be riddled with fun and laughter, simultaneously engaging them in an environment filled with Science based games. Under the guidance of our faculty Ms Hannah Ghufuran. This is one of those unique opportunities that no parent can let go of!
