

## Gardening

### **Mothers and Teachers**

The pride of DPS is its expansive horticulture and lush landscape. The pioneering 'Green School' of Karachi, DPS has been the first to introduce and implement Gardening as a curriculum. To extend this unique insight into the world of flora, we are offering a comprehensive course that will venture with Mother Nature, on a journey to understand the basics of gardening; the essential tools, the general agriculture practices, the benefits of pure and organic farming including the handling of seeds and seedlings and how to harvest the fruit or vegetable.

This is a wonderful opportunity to get back to basics. People will gain insight on how to plant their own produce and what could be better than to practice this amazing feat within the confines of their own homes!!

You are free to purchase the Gardening Kit from the market. However the Instructor Approved Gardening Kit will be available at Saturday School Campus Office at Rs.1500/- only.
