Android Gaming

Primary

Technological advancement requires keeping pace with this fast changing world. The renowned Robo Tech Institute is collaborating with DPS facilities to provide the most valuable opportunity to the undiscovered genius. Their focus on STEM (Science, Technology Engineering & Math) will develop fun techniques for latest technological applications and help shift the focus from screen dependence and gadget addiction to empower the mind and inculcate creative confidence!

Here's an opportunity to visit the exciting warehouses of creativity for android gaming. Students can discover the niches of popular software and design games or develop apps with complete animation and graphics; the perfect avenue to unleash the potential engineer.

Let's churn the gears of innovation!
